Allgemeiner Kommentar commentaires généraux general comments

The Swiss Cat 55 is a high-performance catamaran designed by renowned naval architects Francois Perus and Romain Scolari for fast bluewater cruising. Every element of its design focuses on balance, safety, and ease of handling, even in rough open-sea conditions. With its modern, wave-resistant hull, low rocker and dynamic lift, the Swiss Cat 55 is built to deliver speed and comfort on long voyages. The mid-sized mast and intelligently sail plan including a self-tacking jib, genoa, and gennaker, ensure optimal efficiency and effortless maneuvering, making it perfect for couples or small crews. Daggerboards enhance windward performance and minimize drag, while the weight distribution and use of carbon fiber in high-stress areas provide superior stability and performance. Inside, the Swiss Cat 55 offers a luxurious, customizable interior with fine wood finishes, allowing you to personalize the space to your taste. Built by "Top Marine Costruzione" in Italy, known for its skilled craftsmanship, the Swiss Cat 55 combines cutting-edge materials and meticulous attention to detail. This catamaran is ideal for sailors seeking a balance between speed, comfort, and luxury. Hull number 1 was launched in May 2024 and celebrated it's world premiere at the Cannes Yachting Festival in September 2024.
