Yale cordage Crystalline (Vectran) storseil, Genoa and spinnaker halyards. Merani, 1.5 oz. Asymmetrical spinnaker with ATN spinnaker sleeve

Beschreibung: Nauta Yachts are known to be long-legged blue water cruisers designed to sail offshore. With a length of over 17 meters, you get a good experience even if it is a little sea. The width as well as lead cold means that she does not twist much and feels safe and stable. Good maneuverability in port. "S/Y PAKILAR" is known for sailing easily in low winds, its excellent properties in stamp lakes with soft movements as a result of the design of the hull. A Nauta Yachts 57 is built to cross the great oceans, and all of the winches, blocks and equipment are dimensioned to withstand the stresses of such sea crossings. PAKILAR has a fixed fin keel totalling 3 meters. She is easy to sail and ready to cast off. * EU VAT is paid * Custom made * One off * Extended three feet from factory with elegant terraced bathing platform * New teak deck in 2011 * Quality boat
