Beschreibung

Summary

The 2001 Bavaria 34 is a well-built, spacious cruising sailboat designed by J&J Design, known for its good performance and comfort. It typically features a fiberglass hull, a fin keel, and is powered by a Volvo Penta MD2030 engine. The boat offers comfortable accommodations for family or friends, with a well-appointed interior and an ergonomic cockpit. Cookie is well equipped with Raymarine Instruments with AIS, heating cockpit sprayhood and tent.

Contruction

Constructed using a conventional, modern production-line process with a solid fiberglass or Glass Reinforced Plastic (GRP) hull and polyester resin. This manufacturing method allowed Bavaria to produce spacious and well-made cruising yachts at an affordable price. Construction details **Hull:** The hull is a single piece molded from solid fiberglass, or polyester resin with a glass fiber mat. with the shallow draft version (1.5m). **Deck and superstructure:** The deck and superstructure are also made of molded polyester, featuring non-slip surfaces and designed for efficient production. **Interior joinery:** All plywood and other components for the interior were precision-cut and finished using computer-controlled (CNC) machines before being assembled into modular units. This improved consistency and reduced labor time. **Assembly:** Interior modules were installed into the hull before the deck was attached, a standardized assembly-line process that ensured consistency and repeatable quality. **Keel installation:** The cast-iron keel was installed using a laser-guided jig for accurate placement, and it was both bolted and glued to the hull for a strong seal. **Keel grid:** Beneath the cabin sole, a solid floor assembly consisting of interconnected cradles and stringers was designed to absorb the forces from grounding. **Rudder:** Counter-balanced spade rudder with wheel steering.
