Engine

Mercury 150Hp Outboard engine new 2024

Summary

The Quicksilver 675 Weekend is a popular, compact boat known for its versatility and suitability for both fishing and leisure cruising. It's designed as a trailerable boat, making it easy to transport and store. Key features include a spacious cockpit, comfortable sleeping accommodations for two, and a well-equipped galley. This model is a very good fit for someone who wants: A boat that can be used for day-cruising and weekend trips (sleeping aboard) Enough cockpit space for socialising, sun-lounging, water access (swim ladder) A compact size (for moorings or ease of handling) but still with decent accommodation Quality brand (Quicksilver) with modern features **Sequel price of £59,995 represents a £10,000 saving one the new boat price.**

Performance and Construction

Performance With the top engine option (~225 hp) the boat is capable of brisk performance; one review cited top speeds in excess of ~35 knots (with the 225 hp engine) depending on load and conditions. **Construction** The relatively modest beam (2.50 m) makes it easier to find a berth in busy marinas, and the weight (without engine

~1.6-1.7 t) means trailerability is claimed (for some versions). Because it's CE Category C, it is designed for "inshore/coastal waters" (rougher seas are outside the design envelope). The cockpit design and swim platforms make it a good family boat for day-cruising and overnighting, and the convertible layout adds flexibility.

Accommodation

The boat is designed for both day-use and overnight stays. Cabin area features a **double berth** in the forward section. There is also a **convertible dinette** (3-way) that can be used as dining, forward-facing seating or an extra berth. A galley is included: sink, possibly stove/hob, refrigerator (optional or as part of a package) and storage. Enclosed head (sea toilet) and sink are standard or available options. The cockpit is versatile: seating/dining area converts to sun lounge via a flip-system. Large sun-lounge area at the bow.

Standard Equipment

Dual battery system
CO monitor, smoke detector, fire extinguisher (safety equipment)
Hydraulic steering
Electric & manual bilge pump
Windscreen wiper & wash (starboard)
Swim ladder, swim platforms
Self-bailing cockpit
