## Beskrivelse

FORBINA 10000 VOLVO PENTA KAD-300 EDC 2002 FOR SALE IN SOUTHWEST OF SWEDEN!

Offer price:  
 121.500 EUR (VAT paid)

### Description:

Are you looking for a really well-maintained premium quality Scandinavian flybridge in a size of around 10 meters and have a budget of 100.000 - 130.000 EUR? Don't miss this very well-maintained and well-equipped Swedish Forbina

10000 with a powerful powertrain in the form of a Volvo Penta KAD-300 EDC model year 2002 with only 688 running hours which, together with the boat's duoprop drive, gives the boat good performance and reasonable operating economy considering the boat's size and weight.

What makes this Forbina 10000 extra attractive, in addition to the boat's upgraded engine, is its extended bathing platform, its soundproofed engine box that gives the boat a quieter ride, its new flybridge canopy and extended aft canopy with bimini on an extra canopy arch that gives the aft deck maximum space with the canopy closed, the fine teak on the boat's bathing platform, aft deck and flybridge, its newly upholstered sofas and armchairs on the aft deck and flybridge in premium Silvertex and the boat's very nice modernized interior with newly upholstered sofa and driver's seat in premium textile type Mocca, new long-legged floor mats and new curtains, etc. In addition, the boat has both bow and stern thrusters, electric anchor mirrors in both bow and stern, newer diesel heating system Webasto, newer navigation electronics Garmin with NMEA 2000 network and yacht device connected from the engine to GPS plotters for complete digital engine data, autopilot, etc.

The space that the boat offers on the aft deck, flybridge, in the saloon, kitchen, sleeping cabins and in the bathroom is really good considering the size of the boat. This Forbina 10000 suits the couple or family with children who want to have a smooth boat ownership at a reasonable operating cost and be able to extend the boating season to the maximum thanks to the boat's closed cabin and its new maximized aft canopy that also makes the aft deck a nice socializing place even during the colder, windier and more humid days of spring and autumn.

The layout in the large, bright saloon is perfect with a large U-shaped sofa group for 5-6 people with a height-adjustable dining table on the port side that can easily be converted into an extra double bed when there are several of you who are going to stay overnight in the boat. In the middle of the sofa group there is a large chest of drawers with good storage space, e.g. for a TV and large storage cabinets. In the wheelhouse, from where you as the skipper have a good view out when you are manoeuvring the boat, there is a comfortable single captain's chair and an opening side window out to the SB side deck. The descent to the boat's lower deck is via 2 steps. Here is the boat's large open L-shaped kitchen with a gas stove and oven, double sinks and plenty of storage and shelving. In the open forepeak, which can be closed off with a curtain, there are double single beds. Before the kitchen on the BB side there is a door into the boat's large, bright midcabin with a 2-seater sofa and large double bed as well as a wardrobe and storage cupboard. In the middle of the kitchen on the SB side there is a large storage furniture section with a refrigerator and cupboard storage and the boat's large, pleasant bathroom with an electric flush toilet and shower.

On the aft deck there is a 2-seater sofa and folding table with 2 folding teak chairs. A sturdy stepladder with grab rails that can be folded towards the cabin door to maximize the free space on the aft deck leads up to the boat's pleasant flybridge with a single captain's chair and a smart sofa group with double 2-seater sofas with a flippable backrest for the front sofa so you can choose whether you want to sit facing forward or facing backward towards the rear sofa. The sofa group can easily be converted into an inviting sunbed for 2-3 people during the warm and sunny days of summer.

This very nice Forbina 10000, which is displayed indoors in a heated hall in Landskrona in southwest of Sweden, is sold with a guarantee that its powertrain and all the boat's important systems are functional at the time of the boat's sale and delivery. Winter storage of the boat indoors in Landskrona for the coming season can be included in the sale of the boat! Export and delivery of the boat within and outside Europe is offered.

Spec:

Year: 2000
