Kuvaus

Are you looking for a newer Nordic premium DC in size of 8-9 meters with a maximized well-planned cockpit with fast and smooth canopy handling, large deck areas in the stern and a large well-planned cabin with a closed toilet i the price class 100.000 - 120.000 EUR? Don't miss this well-maintained and very well exta equipped Yamarin 88 DC 2019 with a large Yamaha F350 engine with only 1 previous owner and only 166 hours of running time since new.

The large well-planned cockpit in the Yamarin 88 DC has two inviting sofa groups, a slightly smaller one on starboard and a large one on port that can easily be converted into a large sunbed or extra sleeping space when there are

several of you who are going to sleep on board. Between the two sofas there is a free passage out to the stern of the boat with a canopy compartment, bathing platforms and an extra deck hatch in front of the engine (optional) that optimizes the floor space of the stern. In total, up to 10 people can sit comfortably and socialize in the cockpit, which has a single passenger seat on the port side in front of the boat's galley with gas stove, pull-out refrigerator, sink and drawers for cutlery, and double captain's chairs with fold-down front seats on the helm station with double Yamarin Q16″ navigation displays with complete engine data, integrated sound system, etc., which is perfectly planned and offers a wonderful panoramic view for you who sail the boat.

A big plus with the Yamarin 88 DC is the staircase between the foredeck and the cockpit. Since this type of boat now lacks a side deck, this passage must be perfect, not least when adding on. The Yamarin has the best and widest staircase covered with teak. The foredeck is also covered with teak in the middle, and this is a must on these day cruisers that have large plastic foredecks and windshield glass so the teak in the middle provides perfect anti-slip.

Another highly appreciated solution with this large day cruiser is its flexible solution with the boat's camping canopy that can be quickly and easily folded down (including the canopy arches) and stored in the large canopy compartment behind the cockpit.

The large, bright, cozy cabin in the Yamarin 88 DC with LED decorative lighting and a full 160cm in standing height offers a large double bed measuring 210×140 cm in the forepeak, a 3-seater sofa with removable teak table, wardrobe, storage spaces under the sofa and bed and a closed spacious toilet with electric flush toilet and sink with shower. Under the steps down to the cabin there is a large storage room with entrance to the boat's 210×120 cm bunk with steps down via a hatch under the front part of the sofa on the starboard side in the cockpit. The bunk is also a perfectly large and easily accessible storage room when you do not need to use the bunk to sleep in it.

The boat, which has full documentation (incl. VAT paid invoice) and has been fully serviced since new, can be viewed indoors in Umeå (north of Sweden) and is sold with a guarantee that the boat, its engine and all systems are fully functional at the time of the boat's sale & delivery. Export and delivery of the boat within Europe is offered.

Maintenance:
Latest engine service incl. replacement of timing belt done in May 2025 (running time 142h). Previous engine service incl. replacement of impeller done July 2024. Note that the boat is fully serviced by Yamaha Center service workshop & fully filled out & stamped service book available. Latest polishing & waxing of the boat spring 2025. Latest bottom paint (black East Coast) done in 2024.

Equipment:
Bow thruster Lewmar
