The opportunity is now offered to acquire a factory new fully equipped Viknes 1030 HT Panorama 2026 with the large engine option Yanmar 6LY with 440 hp which can be sold excl. VAT! This is a modern premium boat developed for Nordic conditions, where safety, ease of use and comfort on board are the focus and which combines Norwegian build quality, smart functionality and high comfort in an elegant and robust package.

The Viknes 1030 HT Panorama is a very popular model thanks to its well-thought-out layout and wide range of applications. It is just as suitable for archipelago life, weekend trips and longer holidays as it is for transport, commuting and active boating all year round.

The boat's signature is the bright and spacious panoramic salon with large windows and glass roofs where the forward one is electric openable, that create a fantastic connection with sea and nature. The maximized hardtop solution provides protected and comfortable boating in all weathers, while all the openable glass sections create a lovely airy feeling on hot summer days.

The large inviting aft deck with its substantial electric soft-top canopy that can be almost fully opened at the touch of a button, offers comfortable seating for 6 people, a wet bar with hot and cold water and an extra well-equipped helm station on the starboard side next to the large sliding glass door into the boat's large bright cabin.

A solid lockable door on the aft deck leads you out onto the boat's large bathing platform with grab rail and a large drained storage room. Here there is extra equipment in the form of electric windlass, recessed bathing ladder, shower with hot and cold water and a reversing camera that is installed at the back of the boat's soft-top frame.

There are substantial steps from the aft deck up to the boat's side deck where the starboard side deck has maximum width. Sturdy grab bars are located along the long sides of the cabin for safe movement on deck even in rougher weather. In the bow there is a substantial bow sprit with bow ladder and substantial grab bars for safe boarding and disembarking when mooring with the bow towards the quay.

The interior of Viknes 1030 HT Panorama is characterized by classic Scandinavian design with warm wooden interior, high finish and solid material choices. On board there are well-planned social areas, a practical galley directly connected to the large aft deck, 3 comfortable sleeping cabins, 2 of which with a double bed (the 3rd with a single bed) and generous storage spaces - all designed to maximize comfort and function.

The wheelhouse is ergonomically designed with excellent panoramic views, intuitive instrumentation and easy operation. The hull is stable, seaworthy and developed for safe and comfortable walking characteristics even under tougher conditions.

In terms of equipment, this Viknes 1030 HT Panorama offers i.a. reinforced hull, soundproof foredeck, double electrically opening panoramic glass roofs with pleated blinds in the cabin roof, variable bow and stern thrusters with hold function and remote control, automatic electric trim tabs Mente Marine, electric windlass both fore and aft, 16" GPS plotter/multiscreen Raymarine Axiom 2 PRO, extra 9" GPS plotter/multiscreen Raymarine Axiom 9" which can be moved between the boat's steering stations, radar Raymarine Quantum Doppler, AIS class B transmitter/receiver, reversing camera Raymarine, complete digital engine data in plotter in wheelhouse, autopilot Raymarine Evolution with display p70Rs, extra large diesel heater Eberspächer 6kW with exhaust in all rooms incl. on aft deck, defroster Eberspächer 10kW, deck flushing system with electric flushing pump connected to seawater, solar panels 140W with regulator, extended battery bank AGM, battery charger/Inverter Victron Multiplus 12V/3000W, etc. etc. Don't miss going through the boat's impressive equipment list below!

The boat shown in Landskrona is sold fully seasoned with factory guarantees. Inspection, export and delivery of the boat within and outside Europe is offered.

Trade-in with a slightly older similar cabin boat or possibly a newer motor home can be considered.
