Description

Viksund 360 St Cruz 2008 Cummins 4.2 QSD for sale in Sweden!

Price:
 155.000 EUR (VAT paid)

Description:
 Are you looking for a well-maintained, well-planned flybridge of Nordic premium quality in the size of 11-12 meters in a very good mechanical condition? This very well-equipped Norwegian Viksund 360 St Cruz 2008 with shaft drive and

electronic controls that recently had its powerful Cummins diesel engines fully overhauled and renovated by an authorized shipyard has only run 120 hours since the renovation. Don't miss out on experiencing this very spacious flybridge that is part of the Viknes family and offers high comfort and very good seakeeping!

This Viksund 360 St Cruz offers an open pulpit with teak bowsprit and fold-down bow ladder and wide side decks with sturdy grab rails around the cabin so you and your crew can get on and off the boat and move around on deck with high safety. The large integrated bathing platform in the stern offers space for two chairs or for a rib attached to davits. The boat's cockpit, which is completely open with recessed bunks on both the port and starboard rear sides, is surprisingly large and can accommodate several folding chairs. On the inside of the transom is a nice teak table mounted that can easily be folded up so that you can seat several people at the table in the cockpit. The sturdy steps with grab rails up to the flybridge can easily be folded completely towards the back of the cabin for maximum use of the aft deck area.

A new fine teak deck adorns the boat's flybridge with a dinette/lounge group with teak table and double 2-seater sofas with folding backrests where the front sofa can also be converted into a forward-facing passenger sofa. On the helm there is a single captain's armchair with a flip-up backrest that can be turned towards the lounge group so that you can sit up to 5 people and socialize on the flybridge.

The large, bright, spacious cabin in the Viksund 360 St Cruz is perfectly planned with the large kitchen directly on the starboard side (after entering from the cockpit) and a large, inviting lounge furniture where 5 people sit comfortably at the table on the left. The kitchen has a gas stove with gas oven and a large refrigerator with freezer compartment. In the middle of the kitchen under the rear part of the lounge sofa there is a pull-out 12v fridge/freezer. The helm station, from which you as the skipper have a very good view when you are manoeuvring the boat, has a single captain's armchair and a large opening side window out to the starboard side deck.

Access to the boat's lower deck is via two substantial steps. Midship on the port side is the boat's closed, inviting midcabin with a double bed, a single bed, an armchair and plenty of storage. 3 people sleep comfortably here. In the middle of the starboard side is the boat's spacious bathroom with an electric flush toilet and a large separate shower cubicle with a bench. In the bow is the boat's closed Master cabin with a large double bed and an armchair.

Under the rear hatch on the aft deck is a large storage and technical room with easy access to the boat's generator, etc. Access to the engine room is also available via a hatch on the aft deck and via a hatch in the aft cabin.

The boat's expensive equipment list includes everything from bow- and stern thrusters and electric windlasses both in the bow and stern to diesel heaters, generator, Efoj fuel cell, 200W solar cells, upgraded navigation with new 12" Raymarine GPS plotters both in the wheelhouse and on the fly, new Raymarine autopilot and complete digital engine data with instantaneous fuel consumption, etc. via Mercury Vesselview.

The boat is available for viewing indoors south of Stockholm and is sold with a guarantee that the boat, its powertrains and all significant systems are fully functional at the time of the boat's sale & delivery. Export and delivery of the boat within and outside Europe is offered.

Maintenance:

Both engines removed & renovated for 200,000 SEK during winter 2021/2022. Cylinder heads renovated, all valves & gaskets changed & the engines shimmed. New cutless bearings in support brackets spring 2026. The hull sanded clean and bottom painted spring 2026. New engine service spring 2026 (change of engine oil & all filters). New external zinc anodes spring 2026. Latest polishing/waxing of the boat's hull & deck spring 2026. Generator checked & serviced 2022. The boat is always fully winterized & stored indoors in a heated hall during the winter months.

Specification

Year: 2008

Country of origin: Norway

CE-class: B/Maximum 9 persons

Previous owners: 4

Length: 11.30m

Width: 3.50m

Depth: 1.00m

Weight: 7 tons

Fuel: 660 liters

Fresh water tank: 300l

Septic tank: 100l
Cabins: 2
Beds: 3+2
Seats: 5+6+2
Toilet/Shower: 1/2
Engine: 2x Cummins 4.2 QSD
Hp: 2x270
Running time: 120 hours (after engine renovation)
Drift: Shaft
Cooling: Fresh water
Cruising speed: 21kn
Maximum speed: 35kn
Fuel consumption Approx. 60l/h in cruise
