****Nimbus 335 Coupe Volvo Penta D4-300 EVC****

Swedish sold - Low running hours - Very well maintained - Well equipped

****Offer price:****

179.000 EUR (VAT paid - copy of original VAT invoice exists)

****Description:****

An opportunity has now arisen to acquire a meticulously maintained and well equipped 2011 Nimbus 335 Coupé - a high-quality vessel for those seeking superior comfort, excellent handling, a premium finish, and the peace of mind that comes with long-term ownership quality.

Sold new in Sweden and with only two previous owners, this Nimbus 335 Coupé is in exceptionally good condition and has a impressive high finish. The boat is continuously serviced and maintained by shipyard and has always been stored indoors in a tempered hall during the winters. Combined with the boat's low engine hours, this is a highly attractive example for anyone seeking a well-preserved Nimbus to enjoy for many years to come with a sustained strong market value.

The combination of the Volvo Penta D4-300 EVC and shaft drive is one of the boat's major advantages. The powerful four-cylinder diesel engine provides a substantial power reserve, allowing the boat to cruise comfortably without the engine having to work hard.

At the same time, the traditional shaft drive provides a robust, proven and long-term attractive powertrain - especially for those who prioritize operational reliability, simplicity and good overall economy over maximum top speed.

The Nimbus 335 Coupé is a highly successful blend of premium Swedish quality, excellent handling, and superior comfort. The coupé design makes the boat usable for a large part of the year and provides protection against the elements, while large windows create a bright, inviting saloon with great visibility.

It is the overall package that makes the Nimbus 335 Coupé so appealing compared to many other boats of a similar type and size: solid build quality, a well-thought-out layout, excellent handling, high comfort, and a powertrain that perfectly suits the boat's character.

The boat is available for viewing and seatrial in Gothenburg and is sold with a guarantee that the boat, its engine/drift and all systems are functional at the time of the boat's sale & delivery. Export and delivery of the boat within and outside Europe is offered.

****Maintenance:****

The boat is always continuously maintained & serviced & always winter stored indoors in tempered hall. Latest polishing & waxing of hull & deck spring 2026. Latest antifouling & replacement of external zincs spring 2026. Latest engine service (new engine oil, gearbox oil, fuel filters, oil filter, impeller, engine zinc anodes e.t.c) before season 2026. New impeller pump to engine & new windshield wiper motor & wiper arm 2026. Cleaning of the engine's cooling system (heat exchanger dismantled & cleaned, new coolant, new o-rings e.t.c) autumn 2025.
